

SHASHI PRAKASH SINGH

MERN Stack Developer

📞 +91-7317558726 ✉ singhshashi09871@gmail.com 🌐 github.com/Singhshashi18 🔗 linkedin.com/in/shashi-prakash-singh

Summary

Full-stack MERN developer experienced in designing and deploying **scalable web applications** with a focus on backend and real-time systems. Proficient in **REST APIs**, **Microservices**, **JWT Authentication**, and **CI/CD pipelines**. Hands-on with **Docker**, **AWS (EC2, Lambda, IAM)**, and **database optimization** (MongoDB, PostgreSQL, MySQL). Currently exploring **Generative AI** and cloud-native deployments.

Technical Skills

Programming: Java, C, JavaScript, TypeScript

Frameworks & Libraries: React.js, Next.js, Express.js, Node.js, Tailwind

Databases: MongoDB, PostgreSQL, MySQL

Cloud & DevOps: AWS (EC2, IAM, Lambda), Docker, Grafana

AI Tools: Langchain, Pinecone, RAG (Retrieval-Augmented Generation)

Authentication: JWT, bcrypt, Clerk

Version Control & Tools: Git, GitHub, Vercel, Render

Experience

Backend Developer Intern

July 2025 – September 2025

Esprit Systems Private Limited, Jalandhar, Punjab, India

- Developed and deployed **12+ RESTful APIs** using Node.js and Express, reducing data retrieval time by **40%**.
- Integrated and configured MongoDB with optimized queries, handling over **1,000+ records** with sub-second latency.
- Executed JWT-based authentication and role-based access control across **5+ microservices**.
- Collaborated with a cross-functional team of 6 developers, contributing to a project that improved client onboarding speed by **25%**.
- Integrated **Grafana dashboards** to monitor API performance and server metrics, enabling real-time visibility and reducing downtime by **20%**.

Projects

Spend-AI | *Next.js, Clerk, Supabase, RAG, Pinecone, Langchain*

April 2025 – July 2025

- Built an AI-powered finance tracker processing **100+ receipts/day** with **95%+ accuracy** using OCR and serverless APIs.
- Automated budget alerts via Supabase webhooks and AI insights when usage exceeded **80%** across accounts instantly.
- Reduced manual expense entry time by **70%** by implementing a seamless pipeline that combines Clerk-authenticated uploads with a serverless OCR scanning module, enabling secure and automated ingestion of receipt data.
- Implemented a scalable **RAG-based search** using Langchain and Pinecone, optimizing search relevance by **12%**.
- Link: [🔗](#)

ChatSphere | *React.js, Node.js, MongoDB, Socket.io*

January 2025 – April 2025

- Deployed a real-time chat app for **50+ users** with sub-**200ms** latency using Socket.io and Express framework globally.
- Engineered a secure **JWT auth with RBAC**, session refresh, and password hashing for scalable multi-user applications.
- Delivered instant messaging with delivery receipts, presence tracking, retry logic and real-time user updates across platforms.
- Optimized MongoDB queries and indexes, reducing fetch time by **40%** and lowering CPU usage for high-traffic workloads.

Certifications

- AWS Cloud Practitioner Essentials — Amazon Web Services (IAM, EC2, Lambda, Security) – via AWS Skill Builder [🔗](#)
- Ethics in the Age of Generative AI — Responsible AI principles — via LinkedIn Learning [🔗](#)
- JavaScript Bootcamp – Let's Upgrade — Projects on ES6, DOM, Fetch API, Event Handling [🔗](#)

Education

Bachelor of Technology in Computer Science

November 2022 – Present

IMS Engineering College, Ghaziabad, Uttar Pradesh, India

CGPA: 8.1/10
